Maharshi Patel

Full stack devloper

👤 About Me

Hi, I'm Maharshi Patel, a passionate Computer Science Engineering student focused on Full Stack Development.

I enjoy bringing ideas to life by building responsive, dynamic web applications from end to end. My technical toolkit includes HTML, CSS, JavaScript, and React for front-end development, along with Node.js,

Express, and MongoDB on the back end. I regularly use Git and GitHub for version control and deploy my projects using platforms like Vercel and Netlify. I'm always eager to explore new technologies, work on real-world projects, and grow through meaningful collaboration.
